FIG. 3A

FIG. 3B

FIG. 3C

Figure 1A is a line graph showing the fold-increase in MCP-1 expression over a 24-hour period in response to CRP treatment. The y-axis is labeled 'Fold-increase in MCP-1' and ranges from 0 to 8. The x-axis is labeled with time points: 0, 6 h, 12 h, and 24 h. The graph shows a steady increase in MCP-1 expression over time, starting from a fold-increase of 1.0 at 0 hours and reaching approximately 6.2 at 24 hours. The data points are represented by black squares connected by a solid line.

Time (h)	Fold-increase in MCP-1
0	1.0
6	1.9
12	4.8
24	6.2
